UPCOMING PROJECT INFORMATION

City of Barberton Proposes Safety Improvements on Wooster Road West

SUM-Wooster Road West (PID No. 108240)

The City of Barberton is proposing the reconstruction of Wooster Road West from Hudson Run Road to 4th St NW. The project will reconstruct the entire roadway composed of two 12' travel lanes and will include resurfacing of Wooster Road W and the installation of sidewalks on each side of the road to improve safety for pedestrians. Additional work will include construction of new storm sewer, construction of new curb and gutter, and the reconfiguration of traffic signals.

During construction of the project traffic will be maintained at all times in order to not restrict access to adjacent businesses or residences. Detailed construction updates will be posted along the impacted routes and on the City of Barberton's webpage, cityofbarberton.com, prior to the start of construction. The project is scheduled for construction starting in the spring of 2024 and the estimated cost of construction is approximately \$9,667,257.

To ensure that the decision-making process is comprehensive the City of Barberton is seeking comments from the public, about the social, environmental, and economic impacts of this proposed project. Issues you may wish to comment on include, but are not limited to, the effect of the project on residents, air quality, the local economy, floodplains, and historic or cultural resources.

Any questions or comments concerning the project should be directed to Michael Teodecki, P.E. City of Barberton Director of Public Service, by September 31th, 2022.
