New Construction – SITE PLAN AND/OR PLOT PLAN

This simple layout shows the location of the existing building, front setback, side yard setbacks and lot dimensions, and can be used for most simple residential & commercial projects such as sheds, detached garages, porches, decks, and some additions. The Plans Examiner may require a more detailed site plan. All new One, Two, and Three Family Dwellings will require a detailed site plan. You are required to submit two (2) copies in either situation.
